

Owner View — Guide

A read-only way to check on harvest progress — no login, no username/password, nothing to install.

Opening your dashboard

You'll have been sent a link that looks like:

```
https://.../owner/?key=...
```

Just open it in any browser, on any phone, tablet, or computer. That's the whole login process — the long code at the end of the link *is* your access, so there's nothing else to enter.

Worth bookmarking it (or adding it to your home screen) so you don't need to dig up the link again next time.

If the link ever stops working, ask the farm office for a new one — see "If something looks wrong" below.

What you're looking at

At the top: the farm name, the current date/time, and today's weather.

Below that, a filter bar:

- **Farm / Supplier** — narrow the view to one farm/supplier, or leave it on "All farms / suppliers."
- **Period start / Period end** — the date range you're looking at, or tap **Today**, **This Week**, or **Season** for a quick preset.
- **Refresh** — pull the latest numbers for whatever range is selected.

Then the numbers themselves:

- **KPI cards** — teams/workers/blocks active, total kg and crates, averages, and a Harvesting/In Transit/Received breakdown, all for the selected date range.
- **Harvesting / In Transit / Received** — tap any of these to expand the actual list of loads. Harvesting and In Transit are color-coded:  green (recent),  yellow (been a while),  red (waiting too long) — the same color scheme used throughout the farm's own app.

- **Blocks** — tap to expand a per-block breakdown: crates, kg, and average yield per crate and per tree for the period.
-

What this doesn't show

This link is deliberately limited to progress information — it doesn't show individual worker pay, contact details, or anything you could change. There's no way to edit data from this view; it's read-only by design. If you need more detail than this covers, ask the farm office directly.

If something looks wrong

- **The link shows "This link isn't valid"** — the link may have been regenerated (this happens if it needed to be revoked and reissued) or mistyped/cut off when it was shared with you. Ask the farm office for the current link.
- **Numbers look outdated** — tap **Refresh**, or double-check the date range at the top actually covers the period you're expecting.
- **Nothing loads at all** — check your own internet connection first; if it's fine and the page still won't load, let the farm office know.
